I respectfully urge the Commission to reject the NAB's petition 04-160 and support XM Radio in their efforts to provide the variety and quality of radio listening pleasure afforded by this service. The service of providing weather and traffic reports for the many metropolitan areas is by far superior to that offered by local stations. I feel it is my right as a paid subscriber to the XM Radio service to use the XM Instant Traffic & weather as I see fit to enhance my travels throughout my listening area. Stiffling XM's ability to provide this service would only force me to listen to public/commercial radio services that may not cater to my taste in programming.
